

How long certificates are valid

Certificates are valid for one year from completion. Here's how to see expiration dates and renew.

For: Administrators, Managers, Employees, Individual learners · Updated October 28, 2026 ·

<https://hipaacertify.com/support/article/certificate-expiration>

Certificates are valid for **one year** from the day the training was completed. The date is printed as **Valid Through** on the certificate.

Where to see the date

- **Employees:** **Certificates** shows **Expires:** or **Expired:** on each certificate, with a **VALID** or **EXPIRED** badge.
- **Administrators:** **Reports** shows **Valid Until** for every completion. Dates within 30 days are highlighted.

Renewing

When a certificate is close to expiring, the administrator assigns the course again. Finishing it creates a new certificate with a new one-year date. See [Assign annual refresher training](#).

Individual learners buy the course again. See [Your individual course certificate](#).

NOTE

A HIPAA Certify certificate shows that you completed our training program. It isn't a professional license or certification.
