Verify a certificate (for employers and auditors)

Confirm a HIPAA Certify certificate is real using its number and the holder's last name.

For: Administrators, Managers, Employees, Individual learners · Updated November 17, 2026 ·
https://hipaacertify.com/support/article/verify-a-certificate

Anyone can confirm a certificate. No account is needed.

1. Go to **hipaacertify.com/verify**. There's also a **Verify Certificate** link in the site footer.
2. Enter the **Certificate Number** exactly as printed:
   - certificates from organizations start with **HC-**
   - individual purchases start with **SOLO-**
3. Enter the **Certificate Holder's Last Name**.
4. Click **Verify Certificate**.

Results

- **Certificate Verified**: the certificate is real and current. You'll see the course, the dates, and the holder's name partly hidden for privacy (for example "Ja*** Sm***").
- **Certificate Expired**: real, but past its one-year validity. The holder should complete updated training.
- **Certificate Not Found**: the number was mistyped, the last name doesn't match, or the certificate doesn't exist. Check for typos: the letter **O** vs the number **0**, dashes, and spaces.
